

Table 4. Demonstrates the overall qualitative response to treatment in our study cohort as judged by the authors

Patient No.	FU (mo.)	Cyst sizes on initial and most recent FU period*		Degree of response to treatment	
		Right eye	Left eye	Right eye	Left eye
1	4	3→3	2→2	Moderate worsening	No improvement
2	8	3→1→0	3→1→0	Moderate improvement	Moderate improvement
3**	21	–	2→1→2→3	–	Moderate worsening
4	36	3→0→2→2→1	3→1→2→3→1	Marked improvement (rebound when on BID then improved again)	Marked improvement (rebound when on BID then improved again)
5	35	3→2→2→2→2→3	3→1→1→2→2→1	No improvement	Marked improvement
6	5	2→0→0→0	3→1→2→2	Marked improvement	Marked improvement
7	6	3→1→2→1	3→1→2→2	Marked improvement	Mild improvement
8	19	3→3→2→2→0→0	2→2→2→1→1→0	Marked improvement	Mild improvement
9	4	2→3→3→3	2→3→3→3	Moderate worsening	Moderate worsening
10	41	2→1→1	2→1→0	Marked improvement	Marked improvement
11	13	3→1→1	3→1→0	Marked improvement	Marked improvement
12	6	3→3	3→2	Moderate worsening	Marked improvement
13	7	3→2→2→2	3→2→1→1	Mild improvement	Mild improvement
14	36	3→3→0→0	3→3→0→0	Marked improvement	Marked improvement
15	6	2→3→2	2→3→2	No improvement	No improvement

* 0, no cysts; 1, small size cysts; 2, moderate size cysts; 3, large size cysts

** Not treated eye due to presence of nystagmus
